About Membership

PTCOG membership is open to scientists and professionals interested in proton, light ion, and heavy-charged particle radiotherapy who are committed to advancing cancer treatment through innovative science and technology. Membership is free and requires a simple application process.

Membership Benefits

By becoming a member of PTCOG, you gain access to a wealth of opportunities and resources that support your professional growth and active involvement in the particle therapy community. Here are the key benefits of PTCOG membership:

Participation and Leadership Opportunities:

- Attend Steering Committee Meetings.
- Submit proposals to the Steering Committee.
- Propose the formation of Subcommittees or working groups.
- Chair or co-chair a Subcommittee.
- Be a member of a Subcommittee.
- Hold positions such as Association Treasurer or other officer roles.

Voting Rights:

- Participate in membership votes and contribute to shaping the future of PTCOG.

Scientific Contributions:

- Serve as a session chair during Scientific sessions at PTCOG conferences.

Exclusive Access to Resources:

- Enjoy free access to all materials published on the PTCOG website, including educational and scientific content.

Stay Updated:

- Receive the PTCOG Newsletter with the latest updates, news, and advancements in particle therapy.

Joining PTCOG not only connects you with a global network of professionals but also empowers you to make meaningful contributions to the advancement of particle therapy. Become a member today and be part of this transformative journey.

The membership is free of charge.
