

# CIRT Guidelines Subcommittee

## CIRT Guidelines Subcommittee

### Co-Chairs:

[Bradford Hoppe](#), [Thomas Friedrich](#), [Hitoshi Ischikawa](#)

Administrative support: Katie Moreno (MCF)

### Charges:

- Consolidate Existing Knowledge: Gather and synthesize current research, clinical experience, and guidelines related to CIRT to establish a comprehensive understanding of its principles and applications.
- Develop Evidence-Based Guidelines: Systematically review available evidence to formulate evidence-based recommendations for the use of CIRT in different cancer types, treatment settings, and patient populations.
- Address Clinical Practice Variations: Identify and address variations in clinical practice regarding CIRT, aiming to standardize treatment protocols and optimize patient care across institutions.
- Promote Education and Awareness: Foster education and awareness among healthcare professionals, patients, and caregivers about the benefits, risks, and appropriate utilization of CIRT through the dissemination of guidelines and educational materials.
- Facilitate Collaborative Research: Encourage collaboration among researchers and institutions to conduct further studies aimed at advancing the understanding and refining the practice of CIRT, with

the ultimate goal of improving patient outcomes and quality of life.
